For ~~Fortune Telling~~
Forecasting consider:

Each cardinal-
mutable combo
'makes' the
elements used
by the next!

The Fixed signs
transmute their
opposites.

Example: Cap-Gem -> Ari-Vir:

When you work on the Gemini-Capricorn axis through perhaps assembling a newly purchased chair, you do so through Virgo assembly of Aries, a shape (earth) refined by forethought ($\text{air}^2 / \text{earth}$). Get more esoteric with the words above!

The Elemental Zodiac is based on Ohm's Law. The Science terms were mapped to their alchemical equivalents and the network of DC electricity was mapped using Jungian Insights.

The shape of this network is tetrahedronal, representative of the simplest of the Platonic Solids. Pythagoras called this shape "The Father of all things that living be." We think he was right.
